PostShield... Repair Made Easy...

PostShield is a Green Product!

If preserving and protecting the Earth's resources is a priority with your company or agency, PostShield is THE choice for 4x4 wood post protection. PostShield has been classified as a green product for the following reasons:

- 1) PostShield is recyclable for use again and again.
- 2) PostShield lengthens the life of each post reducing the need to cut down trees.
- 3) PostShield uses less energy to manufacture than competing metal products.
- 4) The PostShield production process yields little to zero greenhouse gas emissions or pollution.
- 5) Contrary to popular belief, the largest element/ingredient in PVC is salt (brine), not petroleum.
- 6) PostShield's color is impregnated and is aesthetically pleasing with natural environments.
- 7) PostShield is an inert product that does not leach anything into the soil or water table. In fact, its components are used in land fills to protect the Earth.
- 8) PostShield's core materials last and last until ready for recycling.

PostShield. Unbelievably simple!

THE Solution for Faster, Safer, Simpler Post Installation, Repair & Replacement

Post & Sign Installation in Minutes, Not Hours!...

...Anywhere a 4 x 4 Goes in the Ground!!

PostShield USA

"Post Installation in Minutes, Not Hours"

Features...

- Greatly increases the life of post by creating a barrier between wood, dirt and concrete; allows water to drain and moisture to vent.
- Helps prevent rot and decay.
- Safer. No cutting while on a ladder.
- PostShield protects against "weed wackers" & lawnmowers.
- UV protected natural color. Can also be painted any color.
- Never jack-hammer concrete or dig posts out again to replace or repair.
- Grooves inside wick moisture away from post.
- PostShield is flexible. Expands and contracts with heat and cold.
- Security screw helps protect against theft of signage.

Designed to Be Used For...

- Fence Posts
- Deck Piers
- Posted Signs
- Retaining Walls
- Mail Box Posts
- Planter Boxes
- Double Gate Center Post
- Play Ground Sets
- Porches
- Arbors, Pergolas and Trellises
- Vineyards

...Anywhere a 4x4 Goes In the Ground!

"There is an additional area where PostShield has proven very valuable—it's great selling tool to the end customer/homeowner. I can do what no other company can do—guarantee the performance of the wood post I install."

Fran Gotzon, Owner of Lehigh Valley Fence Company in Bath, Pennsylvania

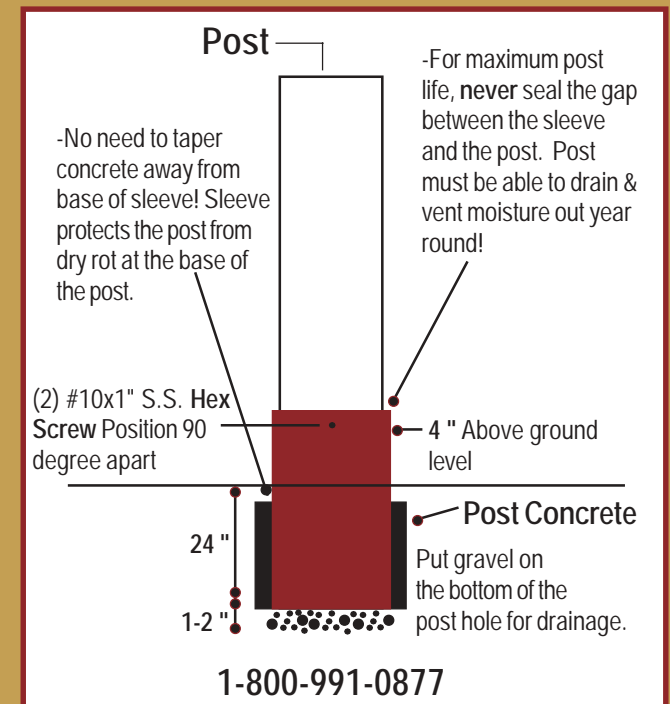

How To Install PostShield...

It's easy:

Just follow the instructions printed on the UPC/UCC Label affixed to each **PostShield**.

PostShield extends the life of your fence/deck posts. Use PostShield in new construction or retro fits. Future repairs are a snap!" Just drop a new post in PostShield and you're done!!

PostShield allows the beauty of genuine wood above ground with the longevity of PVC (vinyl) below ground.
